IQMS Partners with eSP/Stay-Linked to Deliver Enhanced Connectivity for EnterpriseIQ

Thin-Client Solution Extends Real-Time Mobility of Leading, Single-Source ERP Software

Paso Robles, California, November 1, 2006 – IQMS, a leader in the design and development of Enterprise Resource Planning (ERP) software, has partnered with wireless terminal software solutions provider eBusiness Solution Pros (eSP) to deliver increased value and mobility alongside EnterpriseIQ, the industry’s only single-source enterprise software solution. Where wireless device systems may fall out of range, Stay-Linked next-generation wireless access technology assures high-performance, centralized, and secure terminal access in real time via a thin-client design. IQMS customers can now use Stay-Linked in conjunction with the wireless Warehouse Management System to maintain EnterpriseIQ sessions even when disruptions in host access or device-side issues occur.

“Reliable mobile access to the depth of functionality in EnterpriseIQ is often business critical for today’s competitive manufacturers,” said Glenn Nowak, vice president of sales at IQMS. “eSP/Stay-Linked can speed this access while providing added control for the management of real-time business data over wireless devices. By partnering with eSP/Stay-Linked, we are further delivering on our promise to provide a truly agile, single-source ERP solution.”

By combining real-time manufacturing, accounting, and supply chain management into one database, EnterpriseIQ gives manufacturers the business management tools they need to run leaner, more profitable operations. Stay-Linked broadens the mobile access capabilities of EnterpriseIQ users by enabling host-based wireless user sessions in real time, transfer sessions across different devices should the original device be disabled, and multiple device access for the same session.

“IQMS is a recognized industry leader in delivering quality, total ERP solutions,” said Mike Pagani, vice president of sales and marketing at eSP. “We are delighted that IQMS has

selected us as a strategic partner. Wireless terminal applications are increasingly more important to manufacturers. We look forward to working with IQMS to bring the next-generation of thin-client, wireless access to EnterpriseIQ users worldwide.”

About IQMS

Since 1989, IQMS has been a pioneer in the design and development of ERP software for repetitive, process and discrete manufacturing industries. Today, IQMS provides leading real-time manufacturing, accounting, production monitoring, quality control, supply chain, CRM and eBusiness solutions to the automotive, medical, packaging, consumer goods and other manufacturing markets. The only complete, single-source enterprise software solution, EnterpriseIQ offers real-time front office, accounting, manufacturing and supply chain management in a single database. With offices across North America, Europe and Asia, IQMS serves manufacturers around the world. Visit IQMS online at www.iqms.com.

About eBusiness Solution Pros (eSP)

eSP, the developers of Stay-Linked, has been in business since 1991 and is primarily focused on developing, selling and supporting software technology and professional services solutions for inventory control, warehouse management, manufacturing, distribution and retail application environments on the IBM AS/400-iSeries and other highly reliable host-computing platforms. When it was introduced to the market in 2003, Stay-Linked was named the Search400.com/ TechTarget Products of the Year Winner in the PC/Windows Connectivity category. More information is available from eBusiness Solution Pros, Inc., 15991 Redhill Ave., Suite 210, Tustin, Calif., 92780; phone 714-918-7700; fax 714-918-7727; e-mail info@stay-linked.com; or on the Web at www.stay-linked.com.
