Newest Version of EnterpriseIQ Most Comprehensive Yet

IQMS Releases Over 400 Enhancements to its Single-Source ERP Software; Enables Lean Operations Across Total Supply Chain

Paso Robles, California, June 26, 2008 – IQMS, a leader in the design and development of Enterprise Resource Planning (ERP) software, has released the most comprehensive version yet of EnterpriseIQ, the company's widely-used, single-source ERP software solution. With now over 1,000 built-in reports and 400 enhancements to areas such as quality management, electronic data interchange (EDI), warehouse management system (WMS), product lifecycle management (PLM), security, and forecasting, EnterpriseIQ version (7.4.1.20) provides manufacturers with greater capabilities to drive lean and agile operations across their total supply chain.

“The EnterpriseIQ update went so smoothly for our company. This update was highly anticipated by us because of many changes we specifically requested,” notes John Tranquilli, Materials Manager at Apple Rubber Products, Inc. “Enhanced inventory pricing structures and divisional inventory are a huge benefit to our company's sales force and help us manage our distributed products better. This gives us a competitive edge in the industry.”

“Since IQMS began in 1989, we have provided the industry's most innovative single-source software solution to give manufacturers the resources they need to efficiently manage and improve business processes,” says Randy Flamm, president and founder of IQMS. “The newest version of EnterpriseIQ is no exception. We've included a wealth of enhancements that supports lean, real-time, collaborative manufacturing supply chains – all within a single-database, which means EnterpriseIQ is more cost-effective and easier-to-manage than other systems. What's more, our scalable architecture provides smaller manufacturers the flexibility to add advanced features and functionality as they need it.”

As a customer-focused company, IQMS develops products to meet the unique and varied needs of manufacturers in a rapidly changing global environment. Over 90 percent of the enhancements made to the latest version of EnterpriseIQ were customer driven, based on feedback from manufacturers using the system. IQMS customers receive free upgrades with installation, and update documentation is included. Recent enhancements include:

- Expanded EFT payment features, like directory destinations
- Integrated CallerID functionality between telephony and CRM
- Merge duplication record function in CRM that allows duplicate records to be combined using a wizard format
- Batch reassignment capabilities to make employee responsibilities changes quick and easy
- Drop ship functionality enhanced between sales order, purchase order, and shipping to automatically pass information between modules
- Automatic calculation of credit limit
- Expanded capabilities for Functional Acknowledgements in EDI
- Added intricate search capabilities throughout attached documents, which allows users to search for key words, phrases, or pictures
- Extended multiple enterprise plant and multiple GL Year functionality
- Enhanced KanBan capabilities
- Enhanced hard allocation of material functionality
- Production cost calculations by Lot Number, in addition to existing item number, manufacturing number, sales order number, and production order number
- Expanded integration to shipping carriers (FedEx Ship Manager, UPS Worldship, StarShip)

About IQMS

Since 1989, IQMS has been a pioneer in the design and development of ERP software for repetitive, process and discrete manufacturing industries. Today, IQMS provides leading real-time manufacturing, accounting, production monitoring, quality control, supply chain, CRM and eBusiness solutions to the automotive, medical, packaging, consumer goods and other manufacturing markets. The innovative, single-source enterprise software solution, EnterpriseIQ offers real-time front office, accounting, manufacturing and supply chain management in a single database. With offices across North America, Europe and Asia, IQMS serves manufacturers around the world. Visit IQMS online at www.iqms.com.
