IQMS Broadens Comprehensive Functionality for Global Manufacturers

Adds French Language Capabilities to EnterpriseIQ

Paso Robles, California, September 10, 2008 – IQMS, a leader in the design and development of Enterprise Resource Planning (ERP) software has added French language capabilities to EnterpriseIQ, the company's widely-used, innovative, single-source ERP solution. Broadening the comprehensive functionality it provides to global manufacturers, IQMS now supports eight languages, including: English, French, Spanish, German, Mandarin Chinese, Simplified Chinese, Dutch, and Swedish. With its multiple language capabilities, EnterpriseIQ benefits global manufacturers by enabling them to drive real-time, lean operations regardless of geographic boundaries.

“To remain competitive and successful, companies around the world must strategically optimize supply chain efficiency and quality,” says Randy Flamm, president and founder of IQMS. “This often requires language translation across multiple plants and with suppliers, customers and outsourced services. More importantly, to be wholly effective in today's manufacturing environments it might also require multiple languages within the same facility. EnterpriseIQ is more than capable of handling this configuration.”

As a single-source package, EnterpriseIQ is able to provide instant and accurate production data from the shop floor to the front office, in real time, no matter where in the world a facility is located. By equipping multiple locations with native language functionality, within one database, decisions can be made quickly and with absolute communication across multiple plants and globally distributed networks with multiple languages and currencies to track.

“IQMS was founded on the principle of providing manufacturers with flexible, advanced and feature-rich ERP functionality specific to their industry,” says Flamm. “Our single-source architecture provides manufacturers with real-time supply chain information that is unparalleled in consistency,

accuracy and immediacy. Multiple language capabilities only enhance those benefits by allowing manufacturers to meet the high expectations and ever-changing demands of today's global economy.”

About IQMS

Since 1989, IQMS has been a pioneer in the design and development of ERP software for repetitive, process and discrete manufacturing industries. Today, IQMS provides leading real-time manufacturing, accounting, production monitoring, quality control, supply chain, CRM and eBusiness solutions to the automotive, medical, packaging, consumer goods and other manufacturing markets. The innovative, single-source enterprise software solution, EnterpriseIQ offers complete functionality and scalable solutions all in a single database. With offices across North America, Europe and Asia, IQMS serves manufacturers around the world. Visit IQMS online at www.iqms.com.
