

EnterpriseIQ e-Commerce Solutions

Combining ERP and EDI/XML Transmissions

Improving Customer and Supplier Communications

The e-Commerce Solutions within EnterpriseIQ enable you to meet customer demands for processing electronic business transactions, accelerating the flow of information, while enabling effective and more profitable business decisions. Whether you are using traditional Electronic Data Interchange (EDI) or next-generation XML, EnterpriseIQ can handle your requirements. We supply our Tier 1, 2 and 3 customers with the tools and flexibility to meet their customers' toughest requirements in a variety of file formats, including EDI, XML or even Excel®.

The EnterpriseIQ e-Commerce System supports all common EDI formats (ANSI, EDIFACT, Odette, VDA, XML). By translating incoming files directly into EnterpriseIQ (forecasts, releases) and then automatically generating outgoing files for transfer back to customers and suppliers (ASN), the IQMS solution means less interference from outside services and cumbersome data transmission.

Embedded EnterpriseIQ e-Commerce accommodates various industries including the AIAG supply-chain recommended business practices for EDI implementation. IQMS offers programming services to create templates for inbound and outbound files and provides training to customers who prefer to manage their own templates.

BENEFITS

- Reduce administrative and clerical costs
- Increase cash flow through reduction of business-cycle time
- Improve efficiency and accuracy by dramatically reducing data-entry errors
- Cut costs and processing time by eliminating third-party translation software
- Shorten supply-chain cycles
- Provide competitive advantage when selling to large, EDI-capable customers

Review and convert incoming EDI sales orders and forecasts, automatically updating existing release information.

"We have found that IQMS's EDI department is very responsive and extremely knowledgeable."
-Sturgis Molded Products

"The EDI group at IQMS is great! They are thorough, knowledgeable and really follow up."
-Tessy Plastics

"IQMS's EDI has been a huge asset. Our customers push the file over the web and we don't have to use the old-fashioned VAN's."
-Custom Profile

EnterpriseIQ e-Commerce Solutions

Key Features

Transaction Set File Formats - Supports the translation of incoming and the generation of outgoing transactions sets in traditional EDI (ANSI x12, EDIFACT), Odette, VDA, XML, Excel Spread Sheet, Text File/Flat File (csv, tab delimited), and custom file formats (.lrq, .srq).

Communication Methods - EnterpriseIQ supports FTP transmission and receipt of files in addition to working with any VAN or web-based communication method.

Data Validation Protocols - These user-defined business rules that generate exception warnings and documents when violated. IQMS also allows for creation of custom scripts to manipulate data prior to importing into EnterpriseIQ.

Honda Motor Company of America® and AIAG Compliant - Many IQMS customers have successfully completed and obtained certification from all major auto makers. EnterpriseIQ EDI also meets the AIAG supply-chain business practices for electronic communications.

Trading Partners - IQMS has mapped over 100 trading partners in automotive, medical, consumer products, appliances, technology, electronics and other industries.

eServer - Routine daily processing of transactions can be configured for automatic processing via eServer. eServer can be set to process transactions whenever necessary.

EDI Monitor - Provides real-time tracking and status of your EDI transactions sets to verify receipt and validation. EDI Monitor can track both incoming and outgoing transaction sets.

EDI Monitor displays recent and current activity in high volume environments, supporting easy access to messaging and quick responses to issues requiring attention.
