EnterpriseIQ
Intelligent ERP & MES Software

**By Your Side,
Every Step of the Way,
From Start to Finish**

About IQMS

Knowledge, Experience, and Excellence

For more than 20 years, IQMS has been providing powerful enterprise resource planning (ERP) software solutions that enable manufacturers to operate more efficiently and more profitably than ever before. Based upon decades of manufacturing experience, IQMS has developed the most comprehensive and effective ERP solution available - EnterpriseIQ®. The powerful, wide-ranging solution, combined with a deep commitment to customer satisfaction, is why IQMS has one of the highest customer retention rates of any ERP provider.

IQMS: An Intelligent Comprehensive Approach

IQMS Modules Work Together

Because all modules are designed, developed, and supported by IQMS, they operate as a powerful and cohesive solution. EnterpriseIQ is an innovative system capable of handling all your extended ERP needs with a single database - all without the need for expensive third-party software interfaces. This enables a truly streamlined approach to helping manufacturing enterprises stay lean.

Powerful Accessible Technology

IQMS designs its powerful EnterpriseIQ modules for those who use it most - employees. The familiar Windows® environment and intuitive graphical interfaces are so simple to learn that training costs are typically a fraction of most competitors' fees.

Enterprise Execution System (EES)

When you combine a powerful ERP system with a full blown MES system, you get the best of both worlds: An Enterprise Execution System (EES). IQMS is the first company ever to offer a manufacturing EES solution on a comprehensive system for dynamic, enterprise-wide control of information.

Centralized Data Engine

The IQMS total solution eliminates the need and cost of managing multiple databases. The Oracle® powered database is embedded in EnterpriseIQ, delivering seamless utilization while centralizing business activity across your entire supply chain. That means complete access to accurate and current information to everyone at all times.

Industry Knowledge

Active memberships in organizations such as APICS and AIAG help IQMS keep current with the latest manufacturing issues facing its customers. IQMS is committed to addressing the ever-changing compliance landscape with modules that adhere to some of the most stringent requirements such as:

- ISO standards
- TS standards
- FDA requirements
- GAAP standards
- Sarbanes-Oxley requirements
- IFRS compliance

"We were able to bring EnterpriseIQ live in multiple plants, in less time than we anticipated, and well under budget."

-Specialized Technology Resources, Inc.

EnterpriseIQ Core ERP Modules

Innovative Solutions

IQMS delivers solutions that help manufacturing enterprises stay lean, agile, and competitive. We streamline processes across discrete, repetitive, and process manufacturing environments, whether built-to-order or build-to-stock supply chain models.

Manufacturing/Shop Floor Planning

EnterpriseIQ provides a complete manufacturing and shop floor planning system with all the tools necessary to manage production across one facility or multiple plants. The system allows users to make instant decisions based on the total production picture. Optimized scheduling identifies the best start time for each job and any constraints that may affect delivery.

Sales and Distribution

EnterpriseIQ's sales and distribution modules allow immediate response to customer inquiries, order status, history, and tracking. Requests such as ASNs and multiple shipping destinations are easily addressed. Part number cross reference, commissions, and commodities are readily obtainable and information is always available.

Financial Management

EnterpriseIQ makes financial management easy and flexible by providing seamless access to data from sales, distribution, and manufacturing. Intuitive drill-down capabilities allow quick and accurate data analysis. Our comprehensive accounting and general office management system conforms to all generally accepted accounting principles and supports multiple companies, profit centers, and currencies.

Industry Specific Design

EnterpriseIQ was designed for various manufacturing environments on our philosophy that speaking the industry language is the key to success. And that's why our system comes standard with robust functionality for several industry specific needs. Our package meets the unique requirements of all manufacturers, such as unlimited unit-of-measure conversion, production by length or weight, waste material, family tools, dispatch lists and more. Mix and match industry types to best suit your environment.

EnterpriseIQ: A Powerful ERP Solution

Maximizing Supply Chain Efficiencies

IQMS plays a key role in supply chain management by ensuring efficient electronic communication, streamlined production, accurate labeling and distribution, and meeting the dynamic needs of customers and suppliers. IQMS brings it all together for you, seamlessly.

Modular Approach Tailored to Your Company Needs

Start with one of our many base systems—designed for small single-site facilities, large multi-plant/multi-language facilities, or something in between. All of these options are built with a comprehensive solution that includes manufacturing and inventory control, sales and distribution, and financial management. Add enhancement modules as needed to best meet your company's specific requirements. Add what you need when you need it, allowing the system to grow with your business.

Singular Design and Execution Concept

EnterpriseIQ from IQMS is conceived, designed, executed, and supported with one development vision. This provides total control over future development of the software and eliminates the need for costly third party applications. Our modules come together inherently while the competitions' come together via a contract.

“Within the first few months of using EnterpriseIQ, we reduced labor costs by 40% and saved over \$10,000 in shipping related charges.”

-Johnson Precision

IQMS: Your Technology Partner

From the time you make IQMS your technology partner throughout the entire relationship, IQMS specialists are available to assist you wherever you are, in whatever language you speak. We deliver an innovative ERP solution that extends far beyond simply providing software. IQMS is proud to offer its customers one of the best maintenance package available, which includes the following features:

- Customized goal-oriented implementation plans
- Award-winning “live” support services
- Flexible and varied training options
- Enhancement-driven user meetings and online customer forums
- Free software technology upgrades

The exceptional design of EnterpriseIQ allows for multiple locations, languages, and currencies—regardless of geographic boundaries. Major corporate functions, such as invoicing and accounting, can be centralized at one location, saving valuable resources and money.

Rely on IQMS

Manufacturers worldwide have been relying on the EnterpriseIQ solution for more than 20 years. IQMS is a trusted source for delivering the most comprehensive and effective ERP solution available, which is why customers continually retain IQMS as their enterprise software provider of choice. Rely on IQMS for all your business needs.

“We are confident that our use of EnterpriseIQ is one of the main reasons we are staying competitive and profitable.”
