

ELECTRONICS MANUFACTURER SELECTS IQMS' CLOUD ERP SOLUTION

Specializing in the aerospace industry, InterLnX selected IQMS for its industry-specific features and powerful functionality

PASO ROBLES, CALIF. – Oct. 6, 2015 – [IQMS](#), a leading [manufacturing ERP software](#) and [MES](#) authority, today announced that electronics manufacturer, InterLnX, Inc., has selected to replace its Sage system with IQMS. A leading manufacturer of cable assemblies, wire harnesses and electro-mechanical assemblies primarily for the aerospace industry, InterLnX will be implementing IQMS' Cloud ERP solution.

InterLnX's previous software program offered limited configurability and a lack of features. To further complicate the process, InterLnX had to run multiple platforms for different operations and was conducting production and MRP planning manually. The growing aerospace manufacturer knew it was time for a change.

InterLnX was looking for an ERP solution that reduced its redundant work, streamlined its processes and offered integrated control of planning and MRP. InterLnX evaluated MISys, TrueERP, Sage, Exact and Epicor before selecting IQMS. The manufacturer liked IQMS' industry-specific fields and features and the solution's comprehensive, powerful and user friendly design.

"We are very pleased with the responsiveness and the desire to help that IQMS has displayed throughout the evaluation, purchasing and implementation stages," said Matthew Wilhelm, vice president and COO at InterLnX, Inc.

About InterLnX Inc.

Based in Marana, Arizona, InterLnX specializes in the manufacturing of cable assemblies, wire harnesses and electro-mechanical assemblies. With more than 150 years of combined experience in the electronics manufacturing industry, InterLnX excels at producing a quality product at a competitive price.
