

Automotive Expertise

Driving Profitability for Automotive Suppliers

IQMS offers EnterpriselQ, a powerful solution tailored to meet the unique challenges of your automotive industry. To manage increasing customer demands, always evolving industry standards and strict compliance requirements, Tier 1, 2 and 3 automotive suppliers worldwide turn to IQMS for industry-specific ERP functionality to increase their competitive advantage and remain lean.

Addressing Standards Systematically

With IQMS' automotive ERP software, you can stop struggling day in and out to meet the stringent quality standards your automotive industry requires with features such as:

- Tools supporting ISO and TS standards
- Wireless Warehouse Management System and labeling capabilities
- Automatic VIN generator
- Fully automated EDI processing
- Product Lifecycle Management (PLM)

Customers continually rely on IQMS to achieve Tier 1 authorization to Honda of North America, Inc. and other top automakers.

Communication Covered

The "hands-off" Electronic Data Integration (EDI) module assists and expedites your critical business data. By automating inbound and outbound transactions, information is translated automatically and provides accurate generation of automotive critical requirements such as Advanced Shipping Notices (ASNs).

Automotive Focus

As a long-standing AIAG member and participant in the eAPQP Work Group, IQMS has extensive knowledge of automotive standards. Staying abreast of industry needs drives the constant enhancement of our leading-edge software for a performance solution that delivers real, tangible results. Meeting the increasing demands of your automotive industry, while remaining competitive in the global marketplace, has never been easier with IQMS.

Quality Assured

The EnterpriselQ Quality Management System is a powerful solution that enables streamlined operations and a reduced cost of quality. From APQP to Gage R&R to SPC, your automotive quality issues are covered systematically.

Technology Steers Lean Manufacturing

IQMS' automotive ERP solution provides comprehensive support for lean manufacturing initiatives, with features such as:

- Serialized label generation
- Release control management
- Complete audit trails
- Multi-dimensional sales forecasting and planning
- Preventative/predictive maintenance tracking
- Product Lifecycle Management
- eKanban and conventional Kanban
