The Super Count couples the benefits of Setra’s high resolution ceramic sensor with an intelligently designed full-function keyboard to deliver a high accuracy, easy to use counting scale at a surprisingly moderate price.

The patented variable capacitance weighing technology lets the scale display weight changes as minute as 1 part in 125,000. The internal resolution, which is four to ten times greater than the display readability, allows operators to work with smaller sample sizes thereby saving time and reducing hand counting errors.

Each of the seven weighing capacities has been carefully designed to protect the sensor from overload and shock. The heavy duty construction and full two year warranty assure consistent performance even when subjected to rough industrial handling.

Whether used for production weighing, inventory control, transaction processing, kitting or quality control, versatility and extremely high accuracy make the Super Count an exceptional value.

**Versatile full-function keyboard** allows keyboard entry of the average piece weight (APW), tare weight, and ID. Other functions such as weight/count accumulation, selectable update speed, and multiple units of measure add to the flexibility of the scale.

**Internal database** allows storage of APWs and tare weights or the accumulated count for 256 part numbers. Simply key-in the part number and the Super Count immediately recalls the APW/tare weight or accumulated count and is ready to use.

**Accuracy monitor** enables the supervisor to select special settings that check the sampling process and, if necessary, cause the scale to prompt the operator if the number of pieces used in the sample is too small.

**Programmable RS-232 output** with ScriptCoder™ allows up to 10 custom label designs to be printed to a dot matrix printer or, for bar codes, thermal label printer. Label formatting may be programmed directly through the keyboard without a PC.

**Additional Super Count Features**
- Displayed weighing resolution up to 1 part in 125,000
- Bidirectional RS-232
- Keyboard calibration
- Accumulated count or weight
- Auto zero tracking
- LCD display
- Motion/instability indicator
- Selectable display update speed
- Two year warranty

**Super Count is portable when equipped with an optional internal camcorder battery.**
