

Manufacturing ERP

IQMS Shop Floor Control

Superior Shop Floor Visibility Through Two-Way Communication

Take Your Pick: A Variety of MES Tools to Fulfill Your Needs

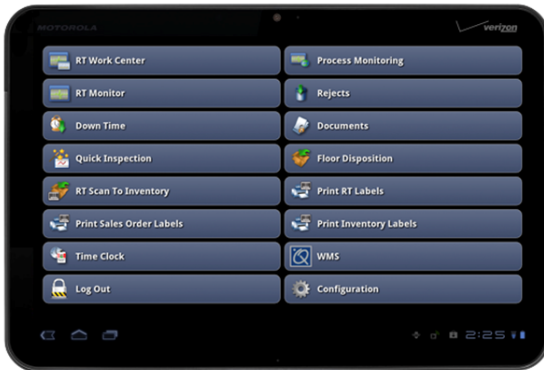

In the world of manufacturing automation, two-way communication between the shop floor and your ERP software is king. From real-time machine monitoring to proactive alerting tools, IQMS offers a slew of MES devices developed to bring your shop floor control to a whole new level.

The options are endless: View machine monitoring details (such as part counts, cycle speeds and other machine processes), production and reject report, address downtime, print labels from anywhere, manage inventory, clock in/out of jobs, perform quick SPC inspections, view documents and so much more in real time, with no batch transfers or cradle uploads.

The beauty of IQMS' advanced shop floor control lies in its comprehensive database. Unlike other ERP companies that require you to try and interface disparate ERP and MES systems, IQMS offers them both in one. As a result, you gain two-way communication in real time for nearly every aspect of your shop floor.

Benefits

- RealTime™ Production Monitoring
- RealTime™ Process Monitoring
- IQAlert
- Preventative Maintenance
- Wireless Warehouse Management System (WMS)
- ShopData
- RTStation
- Android Mobile Tablet
