Spreadsheet Server and IQMS

Excel-Based Add-On for Accurate Financial Reporting

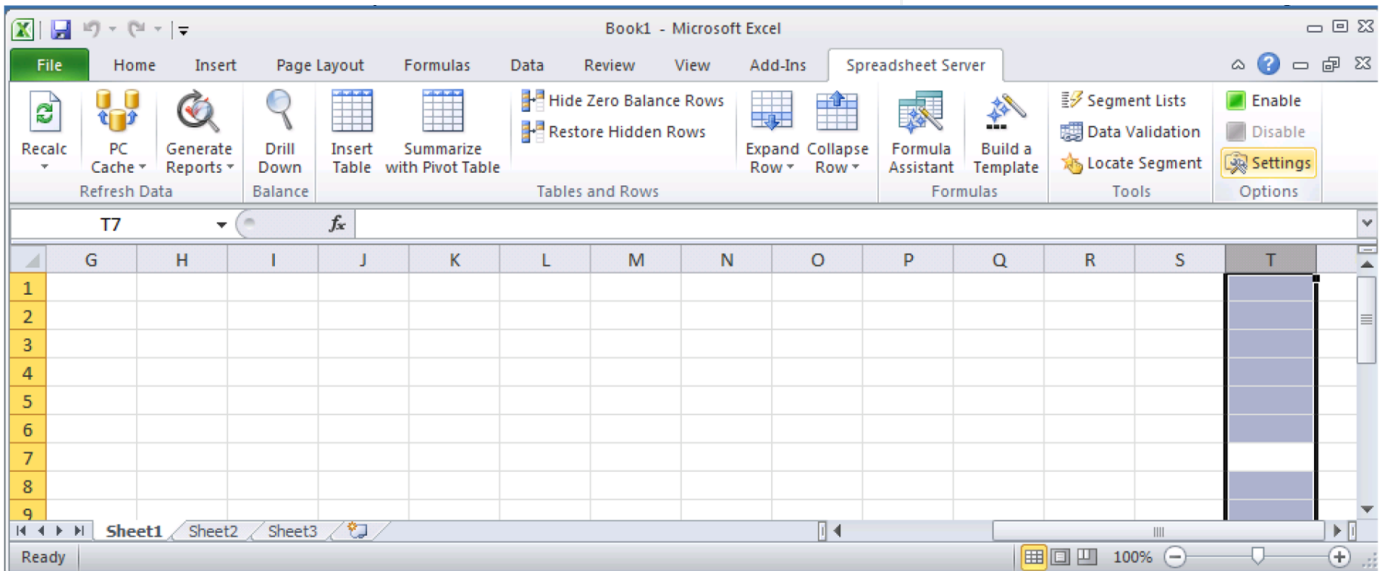

Designed for Seamless, Real-Time Interaction with IQMS

IQMS is pleased to partner with Global Software, Inc. to bring its manufacturers the state-of-the-art financial reporting and analysis program, Spreadsheet Server. Unlike other third-party reporting systems, which rely on old data and require batch transfers or manual rekeying, Spreadsheet Server is a completely integrated Excel add-on feature. Spreadsheet Server interfaces directly with IQMS, providing real-time access and eliminating the need for separate data population routines.

With Spreadsheet Server, you can build financial reports with drill down capability in Excel from up-to-the-minute IQMS General Ledger data. Because Spreadsheet Server is a Microsoft Excel® based product, manufacturers who are familiar with Excel will have an easier time building, configuring and modifying calculations and formulas, much like a standard Excel workbook. Get the financial reporting tools you need to make proactive, accurate decisions with Spreadsheet Server.

Benefits

- Easier to implement and understand because it is an Excel-based product
- Build, configure and modify calculations and formulas with your real-time IQMS General Ledger data
- Eliminate the need for separate data population routines with real-time access to IQMS
- Allows for customer-specific settings and reports

Enhance your products with descriptions, features such as color and size, categories for easy searching, multiple images and external documents attached to the inventory item.

Spreadsheet Server and IQMS

License Levels

Limited Use License:

A limited use license offers the following capability:

Drill down- Allows users to receive reports created by Spreadsheet Server and drill down from any cell and look at transaction level detail data from their ERP solution. Can also change parameters on any query and have the ability to drill down within the query.

Gold License:

A gold user license includes the capabilities from the limited use license above, plus:

Build a Template- Allows users to use pre-configured queries to develop their own custom reports.

Distribution Manager— This tool automates the scheduling of report distribution from directly within Excel, eliminating the time-consuming tasks of printing, copying or creating email attachments just to get information to your end users.

QueryExchange™— An online repository of queries from which the user may download selected queries to the QueryDesigner and then utilize them in Excel. The SmartPak™ feature, utilized in the QueryExchange™, is a method to group pre-configured queries together.

Platinum License:

A platinum user license includes the capabilities from the limited use and gold licenses above, plus:

QueryDesigner— A user friendly tool that enables users to design and maintain queries over any relational database. These queries can be combined with pre-configured formulas in a single Excel spreadsheet.

Spreadsheet Server pricing based on selected license level type and quantity of licenses purchased. For more information, please email sales@iqms.com.
