

# VIN GENERATOR

## OBJECTIVE

Making life easier for manufacturers with DMV compliant VIN sequences for the automotive industry.

## OVERVIEW

The Vehicle Identification Number (VIN) Generator application from DELMIAWORKS<sup>®</sup> delivers ease and compatibility to automotive trailer producers. With the introduction of the VIN Generator application, DELMIAWORKS users can create Department of Motor Vehicle (DMV) compliant VIN sequences with the click of a button. Rather than manually assigning a formulaic number to the product, the new EnterpriseIQ application calculates the vehicle attribute requirements necessary to meet the National Traffic Highway Safety Administration's (NTHSA) standards.

As with all EnterpriseIQ modules, the VIN Generator application is fully imbedded with DELMIAWORKS' single-database manufacturing ERP system. Cumbersome modifications are no longer a concern as the new VIN Generator attributes are varied and can be changed at the user level. Users have the ability to easily create VIN sequences for work order items, as well as integrate those numbers into barcode labels and certificates of origin.

DELMIAWORKS developed the VIN Generator application specifically to meet the growing needs of its customer base in the automotive industry. Like 90 percent of the improvements and features developed for EnterpriseIQ, the VIN Generator was a customer recommendation.

## KEY BENEFITS

- Increase operational efficiency
- Save time and money
- Eliminate excessive data entry and overall margin of error
- Ensure full compliance with DMV and NTHSA standards

Quickly and easily create DMV and NTHSA compliant VINs.

*"The VIN Generator automates the process and does so much behind the scenes. It does everything with a single click of a button, which is amazing!"*

-Load Trail, Inc.

*"The VIN generator and sales configuration templates are unparalleled. We use them every day and couldn't operate without the two."*

-Load Trail, Inc.

## VIN GENERATOR: KEY FEATURES

### Quicker Access to Trailer Information

Because VINs are traceable within EnterpriseIQ, users are able to retrieve manufacturing information regarding the trailers at any point during the manufacturing process.

### VIN Creation Flexibility

Manufacturers may opt to create the VIN early in the manufacturing process if their customer is receiving financing for the trailer, in which case the VIN is required.

### Fully Traceable

Every component that goes into the trailers has full traceable functionality, even down to the tires and spare tires.
