

Virtual Class Agenda

Warehouse Management System (Combined)

This is a five day hands-on course in which the user will be introduced to how to utilize the full DELMIAworks Warehouse Management System including features only available in the Advanced WMS license purchase. The course is taught using the Ataman-based IQRF system (the Apache-based IQWMS system is not compatible with the Advanced WMS features). Topics covered will include product labeling, user profile settings, basic navigation, warehouse transactions, production reporting, shipping & receiving transactions, and system setup configuration.

For attendees only interested in the basic Warehouse Management System features, please see separate agenda.

Who should attend?

- System Analyst, Warehouse managers
- Key managers or personnel responsible for production control, inventory, and materials management

Prerequisites

- Working experience in the DELMIAworks system (recommended)
- Familiarity with your companies material handling procedures

Learning Objectives

- Understand how product labeling is used by the DELMIAworks system
- Configure and manage user profile settings
- Basic navigation through scanner menus
- Perform various different types of transactions
- System setup and configuration for advanced functionality

Licensing

The functionality covered in this class is not included with the core DELMIAworks software package. Specific user licenses must be purchased for each WMS user. The Advanced Warehouse Management system is considered an add-on module and purchased separately.
