

Virtual Class Agenda

EnterpriseIQ Manufacturing II

This five day hands-on course is an advanced level course in which the user will learn how to utilize EnterpriseIQ's MRP based system to its fullest. This course will take you through an in depth look at the entire manufacturing and MRP process. Topics covered will include bills of material, inventory features and options, inventory availability, work order management, material planning, RealTime™ monitoring, customer and vendor RMA's and more.

Who should attend?

Highly recommended for key managers or personnel responsible for production control, inventory, materials and supply chain management.

Prerequisites

EnterpriseIQ software purchased, installed, and currently being utilized at your facility.

Students must have completed the EIQ Manufacturing I Training course or have a basic understanding of all topics, a great working knowledge of EnterpriseIQ manufacturing and be familiar with your company's manufacturing procedures.
